CENTER FOR THE URBAN RIVER AT BECZAK

One Day, Two Hudson River Experiences!

Field Trips with the Center for the Urban River at Beczak
and the Science Barge

Looking for a fun and educational way to explore the Hudson River with your students?

Pick a day, pick a program and join the educators at CURB to discover the biodiversity of life thriving in and around the Hudson River watershed. Then spend the other half of the day with educators aboard The Science Barge, a sustainable urban farm powered by solar, wind and biofuel and irrigated by rainwater.

Through these various hands on interactions with plants and animals, students gain a strong understanding of the Hudson River through the lens of urban environmental education and sustainability.

Make the most of your day and save on buses!

Both organizations provide a **\$50 discount per program** when you book the same day with both of us.

(Discount not applicable for Title 1 Schools)
